### Services

#### Roll-Off Containers

Whether you're planning a small remodel job or a large construction project, LCI Recycling, LLC has a roll-off container that will fit your needs. Service includes the rental of 20 or 30 yard, open-top roll-off container.

A roll-off is a temporary container and is referred to as "roll-off" because the container itself is typically configured with small wheels. The vehicle used to deliver and pick up the container uses a hoist and a tipping bed to roll the container on and off at each site.

LCI, Recycling will provide roll-off container service to residential sites, commercial sites, and industrial sites. We accept rocks, bricks, broken concrete, lumber, building materials, and trash resulting from construction or general cleanup.
